

THURSDAY
JANUARY 24TH, 2008

LEARN & EARN, 8 CEU'S IN 1 DAY

A Building Science Event you can't afford to miss.

Sponsored by **Hallmark Building Supplies, Inc.** and the **Racine Kenosha Builders Association.**

WHAT?

AM Session: 7:30 am - 11:30 am

Residential Construction Techniques and Materials*

4.0 credit hours: Dwelling Contractor Qualifier Certification

This seminar covers fundamentals of residential construction and how they shape building performance. Steve uses photos from field experience to illustrate the "A to Z" of how homes are built, focusing on learning the terminology, systems and methods used in residential construction. Even experienced contractors will walk away from this seminar with a better understanding of the pros and cons of building methods and materials as they relate to building durability, comfort and energy efficiency.

Lunch 11:30 am - 12:30 pm

PM Session: 12:30 pm - 4:30 pm

Builders "411" of the Fundamentals of Building Science*

4.0 credit hours: Dwelling Contractor Qualifier Certification

Understanding basic building physics is critical to building homes that work. This class focuses on understanding how heat, air and moisture movement in buildings impact building performance and product selection. Steve uses real world practical examples to illustrate how the laws of nature interact with building components. This course is designed to give builders the knowledge to sort out fact from fiction among the myriad of manufacture claims.

WHEN?

January 24, 2008

7:30 am - 4:30 pm

Better knowledge. Better buildings.

WHERE?

Infusino's Restaurant

3201 Rapids Drive

Racine, WI 53404
